

### Experienced Wilkinson Staff

When we say that our staff have years of experience, we really do mean it. We recently stumbled across an image from April 2000 which shows Patrick Cooke assembling a chandelier in our old Catford workshop and a second which was taken just last month in our current Bredgar workshop, assembling another chandelier.

Patrick has worked at Wilkinson for 31 years and we have a number of staff that have been with us for over 20 years. Their range of skills are vast and varied from the years they have spent working on a huge assortment of lighting.

Our skilled glass cutters have also been at the company for many years and they currently have an apprentice working alongside them, with the intention to pass on their skills and knowledge to him for the future.

### Matt satin and clear bulbs

Last month we told you about the release of Sudron's new filament LED's, in the image to the right you can see all three variations of this bulb that we have available. All are 1w, giving you a 90% energy saving in comparison to tungsten bulbs. A 25,000 hour life with a 2 year guarantee and at 2700k they give off a nice warm glow. Unfortunately these filament bulbs are not currently dimmable.

All priced at £8.95 + vat each. Discounts offered for 50+ bulbs.

### Did you know....

...that we do not have a summer closure period. We are open throughout the summer months, as we complete the cleaning of lighting in a number of private members clubs during their closures. It is also a good time to complete any restoration on chandeliers and any glass repairs. If you have cleaning requirements or repairs that need completing at any time of the year, just let us know.
