

Chandelier cleaning

Our cleaning services can create the biggest impact even on the smallest of chandeliers. As dust builds up on the crystal it loses its sparkle and looks dull. We clean all chandeliers by hand, using a gentle detergent and then dry them with a lint free cloth so that no water marks are left. Being up close to the chandeliers to clean them allows us to note any damage or missing parts from the fitting and also change bulbs that have blown. Some customers find this especially useful when we are cleaning a chandelier in a hard to reach area such as a staircase or on a very high ceiling, for which we use our specialist equipment to gain access. We supply all necessary cleaning materials so it is a hassle free service for the client.

See us on screen soon...

In April we had a camera crew from BBC come to our factory to capture footage for the soon to be aired 'By Royal Appointment'. We will of course let you know when you can expect to see us appear on your screens.

Glass repairs

Don't forget that as well as hand cutting intricately detail glass items, we can also perform simple glass repairs. One of our most popular services is removing the chips from rims of drinking glasses. Prices start from as little as £10 + vat.

Other services include fitting new feet, legs and bowls on wine glasses, removing and replacing pegs for the stoppers of decanters, as well as removing stains from vases, glasses and decanters.
