The solid cast brass metalwork is finished in English gilt and dark bronze.

**Did you know...** that a majority of the time we are able to shorten the height of a chandelier. So if you are moving or have purchased a chandelier that is too tall for your room (we normally recommend at least 2 metres clearance below the lowest part of the chandelier), then there are various ways we can adapt your chandelier to reduce the height. This may involve shortening chains, removing glass stem pieces or shortening the central metal shaft, if the chandelier has crystal dressings we can also adjust these so that they hang correctly to match their new stature.
